

Naturamin[®]-WSP

GUARANTEED CONTENT

Free amino-acids.....	80,0 % w/w
Total Nitrogen (N).....	12,8 % w/w

APPLICATION AND DOSAGE

Naturamin-WSP stimulates plants during their active growth phase and particularly in situations that may adversely affect their development, such as: root asphyxia, drought, hail, phytotoxicity caused by pesticides, etc.

Crops react well to treatment with Naturamin-WSP when it is applied by means of leaf spraying or in irrigation water.

DOSAGE AND INSTRUCTIONS FOR USE:

- Olives trees, vines, climbing grapevines, banana trees, citrus trees, fruit trees, ornamental and horticultural plants:
 - o Leaves: 3-5 treatments of 50-100 g/Hl, during the cycle
 - o Soil treatment: 3-5 KG/Ha. In 2-3 applications
- Maize, cotton, beetroot:
 - o Leaves: 2-3 treatments of 50-80 g/Hl. During the cycle
 - o Soil treatment: 3-5 Kg/Ha. In 3-4 applications
- Alfalfa
 - o Leaves: After 2nd cutting, 50-80g/Hl.
 - o Soil treatment: After 2nd cutting 1.5 Kg/Ha in 2-3 applications
- Wheat, barley
 - o 2-3 treatments of 0.5-1Kg/ha. Throughout the cycle.
- Almonds, hazelnuts and other non-irrigated fruit trees:
 - o Spray three times, applying 50-100 g/Hl, during budding, formation and growth.

ORGANIC AGRICULTURE

Approved for use in Organic Agriculture according to Regulation (EC) 834/2007 and 889/2008 and NOP Regulation and JAS Regulation. Control ECOCERT. Control CERTICAAE. Control ISNP. Control INTERECO.
