

NoVoJett Rg

Micronutrient containing 730 g/l manganese dinitrate for foliar application

CONTAINS

Manganese (Mn): 235 g/l

NoVoJett Rg is a ready-to-use liquid containing manganese nitrate, for correction of manganese deficiency in a wide range of crops.

DEFICIENCY

Most crops are sensitive to manganese levels, particularly cereals, vegetables, brassicas, root crops and fruit. Both high and low pH soils will suffer from manganese deficiency as well as chalky soils and recently ploughed-up grassland. Puffy soils may suffer from deficiency, as may those which are heavily leached or poorly drained. Stresses caused by adverse growing conditions aggravate the situation.

RATES OF USE

Apply NoVoJett Rg at 1 l/ha. Repeat applications at 10 - 14 day intervals if required. Do not apply more than 5 l/ha per crop per season. Do not apply to protected crops. Use at least 200 litres of water per hectare. Increase the water volume as necessary for application to bush, cane or top fruit.

TIMING

Cereals: Apply from the 3 leaf stage.
Oilseed rape, leaf and root brassicas, sugar beet: Apply from the 4 - 6 leaf stage.
Peas and beans: Apply from 4 - 6 fully expanded leaf stage with repeat treatments as required.
Potatoes: Apply from full emergence.
Grass: Apply when growth re-commences in the spring.
Other crops: Apply when there is sufficient foliage present to retain the spray.

It is recommended that soil and tissue analysis results are used whenever possible to guide micro and macronutrient applications to optimise crop nutrient status. Do not apply this product in very bright sunlight or in temperatures above 25°C. If possible, spray in the evening or early morning for best results.

APPLICATION

Shake the container well before opening and use.

Spray equipment should be clean. Half fill the spray tank with water, begin agitation and add the required quantity of NoVoJett Rg. Rinse the container thoroughly, add the rinsings to the spray-tank, complete the filling and apply without delay. Maintain agitation throughout. Clean sprayer thoroughly after use. Guard 2000® can be added at 0.1 %v/v of water volume to improve spray retention and rainfastness.

COMPATIBILITY

NoVoJett Rg is physically and chemically compatible with a wide range of agrochemical products. Consult your supplier for the latest information. Up-to-date information is available at www.fmc-agro.co.uk. Always read the label of the partner product carefully before mixing with NoVoJett Rg.

NoVoJett Rg is incompatible with fenpropimorph, some formulations of flurtamone, triflusaluron-methyl and boron containing products.

STORAGE

Protect from frost. Store above 5°C. Keep in cool, well ventilated suitable store. Do not store in direct sunlight or near direct sources of heat. Keep out of reach of children. Keep away from food, drink and animal feedstuffs.

SAFETY PRECAUTIONS

H302 - Harmful if swallowed
H314 - Causes severe skin burns and eye damage
H373 - May cause damage to organs through prolonged or repeated exposure
H412 - Harmful to aquatic life with long lasting effects

Danger

P260 - Do not breathe spray
P280 - Wear protective gloves/protective clothing/eye protection/face protection
P301 + P310 - IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician
P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing
P314 - Get medical advice/attention if you feel unwell
Contains: MANGANESE DINITRATE
